(54) GOLF BALL

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a golf ball which has excellent repulsion performance and flying performance and has a good feel of hitting a ball.

SOLUTION: This golf ball consists of  $\geq 1$  layer of cores and  $\geq 1$  layer of covers formed on the cores to coat the same. At least one layer of the cores is formed by vulcanization molding of a rubber composition containing (a) base material rubber, (b) a co-crosslinking agent, (c) an organic peroxide and (d) fullerenes or its derivative.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
